Projects

Smart Local Service Marketplace | [GitHub](#) | [live demo](#)

Dec' 25

- Developed a full-stack service marketplace platform that connects users with verified local service providers for booking services, managing requests, and leaving ratings or reviews.
- Implemented a secure authentication system using JWT, including email verification for account validation, password reset functionality, and OAuth login to support multiple sign-in options.
- Built a real-time communication system using Socket.io enabling direct messaging between users and providers along with in-app notifications for booking updates and new messages.
- Designed role-based dashboards for users, providers, and administrators to manage bookings, track service history, monitor analytics, and handle reviews using interactive charts.

Coupon Management System | [GitHub](#) | [live demo](#)

Oct' 25

- Built a full-stack coupon discovery and management platform that allows users to explore, save, and organize discount coupons from multiple online stores in a single dashboard.
- Developed a secure authentication and authorization system using JWT, enabling users to create accounts, log in securely, and maintain personalized collections of saved coupons.
- Integrated features such as Deal of the Day, Top Stores, advanced search, and category-based filtering to improve coupon discovery and enhance user engagement.
- Deployed the application using Vercel for frontend hosting and Render for backend services, ensuring proper environment configuration and CORS handling.

Training

Mern Stack Developer Trainee

Jun' 25 – Jul' 25

Gokboru EdTech

- Built scalable REST APIs using Node.js and Express.js.
- Implemented authentication, middleware, and MongoDB database operations.
- Developed full-stack applications using MERN stack architecture.

[Final-Prototype](#) | [Certificate](#)

Certificates

- Introduction to Internet of Things | NPTEL (IIT Kharagpur) | [NPTEL](#) Nov' 25
- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | [Infosys](#) Aug' 25
- Introduction to Hardware and Operating Systems | [Coursera](#) Sep' 24

Achievements

- Solved 250+ Data Structure and Algorithms problems on [LeetCode](#) and [GeeksforGeeks](#) covering arrays, linked lists, strings, recursion and dynamic programming.

Technical Skills

Languages: Java, JavaScript, Python, C++, PHP

Frontend: HTML5, CSS3, Tailwind CSS, React.js, GSAP

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, SQL

Tools: Git, GitHub, Postman, Figma, Linux, Vercel, Render

Education

Lovely Professional University

2023 – Present

Computer Science and Engineering — CGPA: 7.71

Phagwara, Punjab

Holly Mission School

2022 – 2023

intermediate — Percentage: 72.60%

Patna, Bihar

St Karen's High School

2020 – 2021

Matriculation — Percentage: 84.20%
